

Walking With Anthony Believes That Everyone With A Spinal Cord Injury (SCI) Should Have Equal Access To Life-Altering Medical Care. Our Focus Is On: RECOVERY THROUGH REHAB.

WE PROVIDE DIRECT AND IMMEDIATE ASSISTANCE to individuals and families through our granting program which includes rehabilitation, care giving, special equipment and emergency funds they so desperately need. Although proven therapies and solutions for those with Spinal Cord Injuries (SCI) are already in existence, they are largely unavailable to the average person suffering from an SCI. The cost of getting just one person out of a wheelchair can run into hundreds of thousands of dollars - and insurance doesn't cover any of it. **WE WANT TO CHANGE THAT.**

THE FIRST YEAR AVERAGE COST FOR THOSE AFFECTED BY SPINAL CORD INJURY IS \$250,000

WITH YOUR HELP, our heroes with SCI can get through the hopeless despair and get the financial assistance to get the treatment they desperately need.

YOUR SUPPORT ENABLES US to directly provide life-changing therapy, much needed caregiving, medical equipment, and other services.

MUCH HARD WORK LIES AHEAD for families affected by SCI, in order to lead them back to living healthy, thriving (even walking) lives. With your help, we can take these first steps... together.

Our Focus Is On DIRECT-TO-FAMILY CARE, FUNDING & INSPIRATION THROUGH:

Rehabilitation Therapy

People with SCI need 10 hours of therapy, at \$100 per hour, every week. Without financial assistance of any kind, most people with an SCI would have to make an impossible choice: pay for therapy that would prevent further injury and complications or pay the rent and buy groceries. Walking with Anthony covers the cost of essential rehabilitation therapy so that people suffering from an SCI can face the enormous challenge of physical recovery with freedom from the relentless financial weight of paying for rehab. Recovery from spinal cord injury requires intense rehab to prevent further complications. By strengthening the rest of their bodies, people with an SCI can improve their quality of life.

Emergency Funds

No one plans to suffer an SCI. The sudden and always unexpected nature of such a debilitating injury brings with it many urgent, immediate needs and expenses. Walking with Anthony helps care for those initial financial emergencies to help people who would have nowhere else to turn to care for even the most basic of tasks and challenges. That's why your giving is so crucial; no one knows they'll need the assistance, but you can make sure Walking with Anthony is ready to help when the need unexpectedly, tragically arises.

Caregiving

Getting out of bed. Getting dressed. The things most of us do every day, people suffering from an SCI need assistance to accomplish. Imagine hiring someone to help you get ready in the morning... every day of your life. For people with an SCI, that's a reality. Your support of Walking with Anthony helps cover the costs of receiving the necessary care for basic, everyday life. What many of us take for granted are luxuries, and expensive ones, for those who suffer from SCI.

Special Equipment

When people suddenly lose mobility, they find themselves trapped in a world that cannot be navigated without a wheelchair or facilities designed to accommodate a wheelchair. For most people with an SCI, that requires not only the purchase of a wheelchair but also a major home renovation to make basic mobility and function possible for someone in a wheelchair. The cost can be overwhelming, even impossible. Walking with Anthony helps make wheelchairs, wheelchair accessibility, and other special equipment needs attainable for people with SCI. Your gifts change an otherwise hopeless situation into a life where people with SCI can live, function, and thrive.

Building A Community Of Support For the person who suddenly is afflicted with SCI, for their entire family even, there are usually very few if any people outside of the home who can relate to what they're going through. Most friends don't even know where to begin with what to say or how to act. It can be incredibly isolating. After the initial shock of an event, people who don't live in the same house typically resume their normal lives. That often leaves SCI individuals and their families with the choice either to face the struggle alone or to feel like they're begging for help, which can be humiliating. Led by Anthony & Micki, Walking With Anthony has created an ever-growing community of SCI heroes who can look to each other for guidance, emotional support, friendship, and so much more. In moments when they need inspiration and a reminder that life with SCI can and will be full of joy and meaning, Walking With Anthony provides proof that it does get much better.
